Consultancy**

design & print management solutions 

Go Greener

The Print Consultancy take the preservation of our environment very seriously. We continually strive to do what we can to help, we explore advanced methods of production, improve our policies on recycling and investigate the range of recycled and recyclable materials we use.

Avenues we explore include:

- **The widening range of recycled and recyclable materials**
- **Ongoing relationship with paper manufacturers on the benefits of mixing recycled and sustainable elements in the production of paper and boards**
- **Biodegradable products**
- **The use of organic materials**
- **Methods of powering – solar, by hand, water etc**
- **Materials from sustainable sources**
- **Monitoring of equipment emissions**
- **Choices of reduction and recycling of packaging**

With Print there is a misconception that we can save forests by reducing our printed paper production. However, paper forests are fully sustainable and protected by such accreditations as FSC. There are a large number of highly qualified experts who would confirm that using a paper that is 50% recycled and 50% FSC is better for the Environment than 100% recycled.

Design

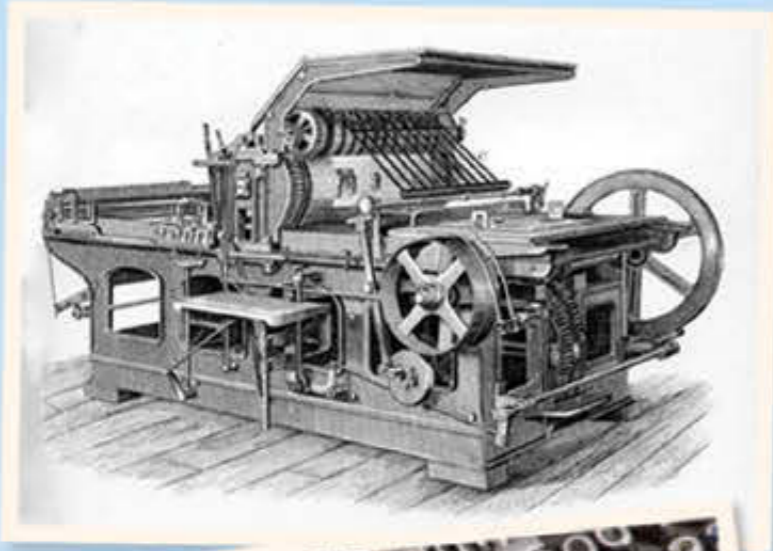

We provide an individual service to every client, ensuring the principles of good design produce the right creative solutions to your marketing needs. Delivering the finished product with the best possible service, on time and on budget.

We are happy to take on artworking and layout projects, as well as full design. Taking new copy and positioning in existing style and guidelines, also correcting of existing artwork, to original source files or pdf's, prior to printing.

The building of websites has been a major growth area for our Design team in 2008, please visit our web section to link to some great sites we have developed recently.

We can design everything you need, including:

- **Advertising**
- **All types of printed material, including Leaflets, Mailers, Brochures, Newsletters, Magazines and Books**
- **Exhibition & Show Graphics and Display materials**
- **Web Sites, Emailers and CD Roms**
- **Point of Sale Material**

Print and Print Management
